

Category: Revision

Title: NEH Study Grants for College and University Teachers.

Form Number: NA.

Frequency of Collection: Annual.

Respondents: University and college faculty.

Use: The application instructions provide direction for preparing narrative and budgetary parts of applications for grant funds.

Estimated Number of Respondents: 1,816.

Frequency of Response: Once.

Estimated Hours for Respondents to Provide Information: 3.51 per respondent.

Estimated Total Annual Reporting and Recordkeeping Burden: 6,411.16 hours.

Thomas S. Kingston,

Assistant Chairman for Operations.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION**John F. Kennedy Assassination Records**

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice to Federal agencies.

SUMMARY: In accordance with the President John F. Kennedy Assassination Records Collection Act (Pub. L. 102-526, 106 Stat. 3443) and after consultation with Government offices, NARA has created an identification aid system and established an electronic database in which to store information on each assassination record subject to review under the act.

Agencies having any records relating to the assassination of John F. Kennedy are reminded to provide agency contact point information to NARA as explained in the *Federal Register* notice dated November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mary Ronan, Access Staff, National Archives and Records Administration, 202-501-5380.

Dated: December 10, 1992.

Don W. Wilson,

Archivist of the United States.

NUCLEAR REGULATORY COMMISSION**Draft Regulatory Guide; Issuance, Availability**

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

Draft Regulatory Guide DG-1010, "Quality Assurance Program Requirements," is the proposed Revision 4 to Regulatory Guide 1.28. This guide is being developed to describe methods acceptable to the NRC staff for establishing and implementing the required quality assurance program for the design, construction, modification, and decommissioning of nuclear power plants.

This proposed draft regulatory guide would integrate current guidance for complying with appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities." In appendix B, section II, "Quality Assurance Program," states, "The quality assurance program shall provide control over activities to an extent consistent with their importance to safety." In an effort to recognize current interest in applying risk-based techniques to the regulatory framework, the NRC staff is soliciting comments on how risk-based techniques can be applied to the quality assurance program in a way that maintains safety and allows a gradation in the application of quality assurance consistent with the importance to safety of the structures, systems, and components.

The NRC staff is particularly interested in receiving comments on the impact of basing the annual evaluations on activities performed during the previous 12 months, including some type of direct observation of the operation of the suppliers' quality assurance programs (see Regulatory Position 3.2.2 of the guide).

The staff is also soliciting comments on whether this regulatory guide should be expanded to cover quality assurance programs in nuclear facilities other than power reactors and fuel reprocessing plants. Because of the general

applicability of quality assurance programs, there may be an advantage in using a single regulatory guide to provide uniform guidance on quality assurance programs for a broad range of activities, thereby leading to simplification of quality assurance activities.

Commenters may submit comments in an electronic format in addition to the paper copy. Comments in an electronic format should be IMB PC DOS compatible 3.5- or 5.25-inch double-sided, double-density diskettes. Data files should be provided in WordPerfect 5.1, ASCII code, or IBM revisable-form text document content architecture.

The draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by February 8, 1993.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Distribution and Mail Services Section. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 24th day of November 1992.
